Experience

Senior Software Engineer*

08/2020 - Present

Folio3, Karachi

- Currently working on a SAAS-based Real Estate Management system ([Propertese](#)) as a full-stack developer. Built Frontend from Scratch including structure and architecture.
- Created many Real Estate Management System modules on both the Frontend and Backend ends.
- Co-Leading the frontend team and developed the product from scratch
- Migrated React 17 to 18. Migrated build process from Webpack to Vite and optimized the frontend app
- Mentoring junior developers and delivering tech sessions
- Implemented OAuth and Token based authentication
- Brainstorming with the product manager, having technical discussions with the architect and participate in product and project estimations. Conducting Code Reviews. End to end deployment from Dev to Production.
- Technologies and tools used include HTML, CSS, SCSS, Tailwind Css, ESLint, React, Redux, Node, Express Js, GraphQL, AWS, Knex, Objection.js, MySQL, Kafka and Amazon SQS
- Collaborated with architects to design and define service boundaries for microservices.
- Applied JWT middleware to backend for authentication purpose.
- Working in TDD (Test-Driven Development) and performed testing using Jest and Enzyme.
- Active participant in daily scrum meetings and involved in many phases of Confidential using Agile methodology.
- In my previous projects, I have utilized various tech stacks, including React Native, Vue JS, Angular, Next JS, React, Redux, MongoDB and Oracle Netsuite Customizations

Full stack Developer

04/2022 – 10/2022

Counterweight, Freelance, UK

- The Counterweight Plus programme was used in the direct clinical trial, the world's largest ever study of type 2 diabetes remission funded by Diabetes UK. The programme was so successful that it made waves in the medical world and changed the understanding of treatment and management of type 2 diabetes around the world.
- Worked as a Fullstack Developer on a Counterweight programme Type 2 Diabetes Management.
- Developed various features including authentication, onboarding, team and client management, group management, invitations, appointment scheduling, patient record-keeping, and patient history tracking
- Developed a chat feature using Stream.io
- Microservice Architecture on backend
- Utilized HTML, CSS, React, TypeScript, Bootstrap, React Query, Node Js, AWS, TypeORM, MongoDB, GraphQL, Kafka as part of the technology stack
